Why should I be limited to AM/FM radio broadcasts of traffic and weather? I have XM satellite radio in my car and I willingly pay for this service. When they added traffic and weather back in March, I was delighted. Not only am I getting up-to-date information, but it is repeated 24 hours a day. By the time I hear the traffic broadcast on AM/FM radio, I am already stuck in the jam. Traffic is an added bonus on my XM broadcast which I do not want to lose. I am a Disc Jockey. It is my opinion that XM's music services have helped increase Compact Disc sales for the lesser bands that do not get airplay on AM/FM radio. My CD collection has definitely increased due to XM's variety of music. The variety offered is wonderful.

XM Satellite Radio is the best investment I have made in many years. Please reject NAB's petition 04-0160.

Thank you for your time.
